# PF-R™

## PLATEFRAME-REDUX

The PF-R™ out-performs all other carriers in its class in performance, comfort, and modularity. Other than the S&S PF-M™, it is the only armor carrier system with the **patented (US 10605574)** adjustable Auto-Fit Cummerbund™ and thoracic load-bearing technology. By using a single layer of semi-rigid composite material with laser-cut MOLLE/PALS slots, we were able to keep the overall weight to just over 1 lb. When properly fitted, the PF-R's Auto-Fit Cummerbund™ helps to distribute the weight of the operator's loadout across their entire torso while still allowing for expansion of the chest and lungs. Together the Auto-Fit Cummerbund™ and lightweight, hydrophobic plate wrap system help the user to feel comfortable, while offering impressive strength and durability even under heavy load.

*Optional add on Interior  
Load Bearing Wings*

*Auto-Fit Cummerbund™ and  
thoracic load-bearing technology*

*Lightweight, hydrophobic  
plate wrap system*

# OSS REDUX

## OPERATOR SYSTEM SUITE (OSS)

The OSS Redux is a series of minimalistic and practical set of pouches designed to be paired with our PF-R™, yet versatile enough to be used with any of our carriers or standard MOLLE/PALS webbing system. This series is constructed of light-weight, hydrophobic material that is durable, long-lasting and will shed water to reduce weight in wet environments.

**SINGLE 40MM POUCH**

**TRIPLE 40MM POUCH**

**RADIO POUCH**

**FRAG POUCH**

**SMOKE GRENADE POUCH**

**HYDRATION POUCH**

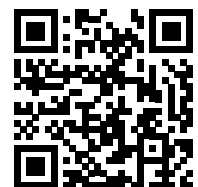

**TRIPLE M4**  
Single & Double Also Available

**3 MAG POUCH RAP**  
Rapid Attachment Panel (RAP)

**HALF RAP**  
Rapid Attachment Panel (RAP)
