**ATTACH THE UNIVERSAL GRENADE LAUNCHER HOLSTER VIA MOLLE/PALS STRAPS**

- 1** Open bag and locate the 5 straps.

- 2** Begin to weave the GLH-U's MOLLE/PALS straps under the 2nd strap of the GLH pack.

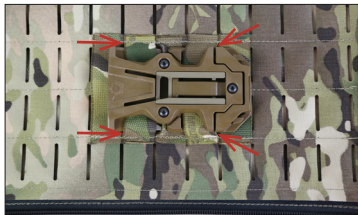

- 3** Weave MOLLE/PALS straps through MOLLE/PALS slots. Tuck stiffened tabs back into the GLH-U.

- 4** Insert grenade launcher into the GLH-U as shown. Trigger will "click" into place when installed securely in GLH-U.

- 5** Adjust the GLH-U retention strap to ensure the weapon is held securely in the GLH-U. Feed excess length into the GLH-U.

*Optional GRT reinforced webbing adapter included with GLH-U. See page 5 for instructions.*

**NOTE:** After attaching GRT Adapter to GLH-U (see page 4) the holster will work with either the Webbing or Belt Adapter by sliding into place and then insert launcher into holster (like step 4 above).

GLH-XX

## ATTACHING GEAR RETENTION TRACK (GRT) ADAPTER

Begin with the MOLLE/PALS configuration

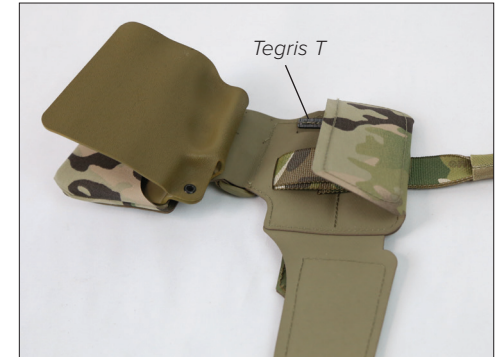

1

To remove MOLLE/PALS straps open up inside Velcro pocket.

2

Pull down Velcro flap.

3

Pull the GLH-U clamp out of the pocket to expose the Tegriss T and binding posts.

4

Remove MOLLE/PALS straps, screws and binding posts. Keep screws and binding posts for GRT installation

5

Line up GRT® Adapter panel with holes as shown and insert binding post. Turn holster over while holding binding post in place. Repeat on the bottom hole.

6

Install GRT track with screws and binding post.

**NOTE:** The GLH-U is shipped in a right-handed configuration. For instructions on left-handed GLH-U configuration, scan QR code below.

**ADJUST MBS FOR DIFFERENT BELT WIDTHS**

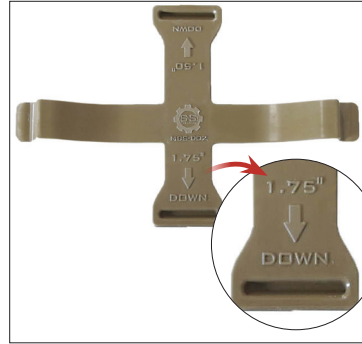

**1**

The GRT™ Reinforced Belt Adapter is compatible with 1.50", 1.75", and 2.00" wide belts. The belt adapter ships with the Multi-Belt Stabilizer (MBS) pre-set for a 1.75" wide belt and adjustable for a 1.50" wide belt. For 2.00" belts, simply remove the MBS from the adapter.

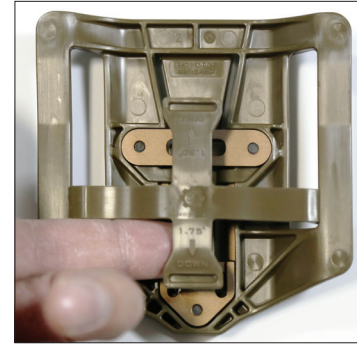

**2**

To adjust for a 1.50" wide belt, flip the GRT™ Reinforced Belt Adapter to back side to access the MBS.

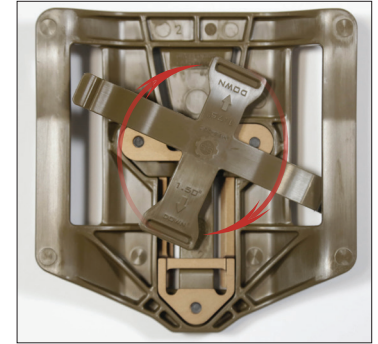

**3**

The orientation of the MBS dictates what belt width the adapter will accept. Belt width markings can be found on vertical members of the MBS. The word "DOWN" and a downward facing arrow with the respective belt width indicates what belt width the adapter has been configured for.

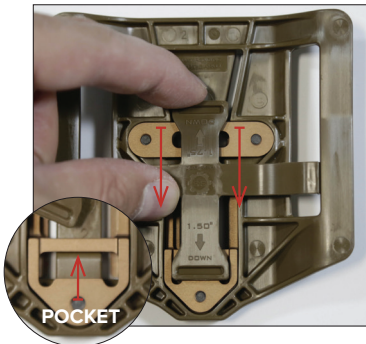

**4**

To remove the MBS, lift the vertical member in the 6 o'clock position and rotate the MBS clockwise.

**5**

Rotate the MBS 180° so the words, "1.50" DOWN" can be read upright.

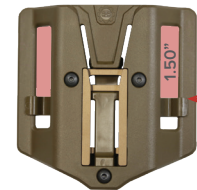

**6**

Ensure that the horizontal members in the 3 and 9 o'clock positions snap into place and that the bottom tab locks into pocket indicated above. If locked correctly, the MBS should not move side to side or up/down.

**7**

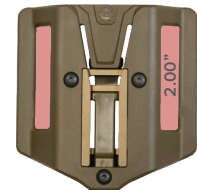

Flip the adapter over. The GRT™ Reinforced Belt Adapter has now been configured for 1.50" wide belt.

MBS set for 1.50" belts

MBS set for 1.75" belts

No MBS needed for 2.00" belts

**1**

To disassemble the GRT™ Reinforced Webbing Adapter, squeeze the left and right snaps indicated in the image above. Separate the GRT Webbing Adapter and the Webbing Adapter Lock as shown in the image on the right.

**2**

Feed the Webbing Adapter Lock through the desired two columns webbing on the bottom row of MOLLE as shown.

**3**

Feed the GRT™ Reinforced Webbing Adapter tabs into the row of MOLLE above the row the Webbing Adapter Lock is located. Ensure that the GRT™ Reinforced Webbing Adapter snaps are prepared to feed into the Webbing Adapter Lock.

**4**

Once the GRT™ Reinforced Webbing Adapter tabs are fed into the top row of MOLLE, pull the adapter down and into the Webbing Adapter Lock. The GRT™ Reinforced Webbing Adapter should snap into the Webbing Adapter Lock indicating that it is secured.

### SECURE GLH PACK

**1**

To secure pack, thread zip tie through zipper pulls, through pocket shown and through the opposite zipper pull.

**2**

Cinch zip tie and secure zipper pulls.

**PRO TIP:** Unbuckle and pull ID window through handle. For fast deployment, grab both handles and pull apart to engage both zippers.

### BANDOLIER AND SLING CONFIGURATION

**1**

The bandolier can be adjusted to user's preference.

**2**

The adjustable bandolier holds 12 40mm grenades and can be worn around chest or waist with equipment.

**3**

Use with sling pack for easy access to Grenade Launcher and additional ammunition.
