

Grenade Launcher Accessories

These mounts allow the operator to accessorize the HK GLM/M320 with laser systems and red dot optics while maintaining the ability to collapse a full length buttstock underneath the base mount. Specifically designed to reduce material weight and overall size.

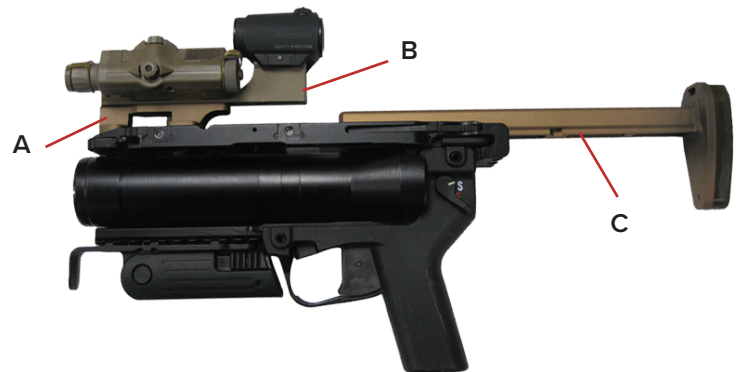

MOUNT BASE (A)

STEPPED RAIL (B)

LOW PROFILE RAIL

BUTTSTOCK (C)

- A compact, lightweight (7.9 oz) alternative to the standard issue HK GLM stock (1 lb 11.9 oz)
- Made of 7075 Aluminum with rubber composite pad and attachment point for retention systems
