PRODUCT NAME:

PF-M Cummerbund Install

INSTRUCTIONS:

1 Apply Loctite to the top portion of the threads closer to the head

2 Align holes to back panel for proper install of the cummerbund hardware

3 Holes are aligned properly when there is an obtuse angle with back panel and cummerbund

4 Binding posts gets placed on the inside of the PF-M

5 Hex screws get placed on opposite side, external of the back frame

6 Utilized the provided spanner wrench to hold binging post in place while you tighten

7 Use a 3/32 hex key to tighten into the binding post while holding spanner wrench

8 Repeat steps 1-7 for the other 3 remaining hex screws and binding posts
